## Profile

A versatile Mobile and Web Applications Developer with a strong passion for transforming creative ideas into powerful and elegant applications using **Flutter**. I have extensive experience in building seamless user experiences and designing attractive interfaces that adhere to the latest design standards.

My expertise extends to developing web applications with **Flutter**, complemented by a solid foundation in **HTML**, **CSS**, and **JavaScript** to deliver fully integrated experiences across different platforms. I am also proficient in **Figma**, **Adobe XD**, and **Photoshop**, which allows me to craft modern designs that enhance the overall user experience.

I am constantly striving to enhance my skills and stay updated with the latest technologies. I thrive on challenges and excel at working under pressure to deliver high-quality results that exceed expectations.

## Professional Experience

### Soltan Volunteer Team

Lead Front-End Developer | UI/UX Designer

2025 – Present  
Syria-Swaida

- **Technical Lead & Developer:** Led the development and launch of a comprehensive administrative application to streamline volunteer and management operations.
- **Design & Development:** Personally designed and coded all app interfaces, including an e-wallet, focusing on creating a seamless and high-performing user experience.

### Virtual Modern School

Lead Front-End Developer | UI/UX Designer

2024 – 2025  
United States (Remote  
from Syria)

- **Full-Stack Development:** Developed the entire front-end for an administrative and educational platform using **Flutter**, while also designing all user interfaces in **Figma**.
- **Team Collaboration:** Worked with a team to ensure smooth integration with the back-end, resulting in a high-performance, cross-platform application.

### Freelancer

Mobile & Web Application Developer

2020 – 2024

- **Developed and launched diverse mobile and web applications** over a 4-year period, specializing in enhancing user experience and app performance.
- **Managed projects and delivered high-quality, innovative solutions** while working under tight deadlines.

## Projects

---

### Sultan Volunteer Team App

Sultan Volunteer Team

A comprehensive administrative mobile application that streamlines the workflow for volunteers and management. It includes key features such as an e-wallet and task management systems.

- I developed this with Flutter.

2025

### Virtual Modern School [↗](#)

Syrian Virtual School

An educational and administrative platform designed to manage students and teachers.

- I developed this with Flutter.

2024

### Twenty Personal Assistants

Graduation Project

Developed twenty different personal assistant applications within a single framework.

Achieved a **95% degree**, demonstrating expertise in Flutter development.

- I developed this with Flutter.

2024

### E-Commerce Application [↗](#)

Personal Project

The application combines a visually appealing user interface with a seamless shopping experience, robust security features, and online payment support.

- I developed this with Flutter.

2023

### Wanderlust Trip Management System [↗](#)

Personal Project

A trip management application designed to organize and simplify travel plans.

- I developed this with Flutter.

2022

### Hotel Management System Application [↗](#)

Personal Project

A comprehensive application for managing hotel operations, including room booking and guest services.

- I developed this with Flutter.

2022

### Smart Location Phone [↗](#)

University Project

A web-based platform for displaying and selling smartphones. This platform serves as a comprehensive online store, allowing users to browse, compare, and purchase the latest smartphones.

- I developed this with Flutter & HTML / CSS / Javascript.

2021

### ABC (Accounting Software)

University project

A desktop application for accounting and financial management.

- I developed this with C# and SQL Server 2008 R2.

2020
